

Lab Head (m/f) Explants

Succeed at Merck!

In other words: You're a competent professional. A strong team player. Reliable and dedicated.

Merck is a successful global pharmaceutical and chemical company that offers talented and entrepreneurial employees interesting prospects!

The position: You will be responsible for establishing and running a laboratory in the field of osteoarthritis, dealing with cartilage cell culture and cartilage explants. You will develop and maintain competence in the analysis of cartilage break down products

and other biomarkers as well as in statistical analysis. In addition to taking over responsibilities as project team leader, you will interact closely with the in vivo laboratory manager and will manage interfaces to other functional units. You will propose concepts leading to the discovery of new targets in osteoarthritis, while ensuring that laboratory work is compliant with all regulatory and scientific requirements.

Prerequisites: An M.D., D.V.M. or Ph.D. in Biology and several years of experience as a laboratory manager, ideally in the pharmaceutical industry. You

will have a solid background in biology and the pathophysiology of osteoarthritis. Further, you will be experienced in the area of setting-up and running ex vivo/in vivo assays relevant for pharmacological studies.

More details are available on the Web.

If you'd like to get ahead, then shape your future with Merck!
